LEAD-FREE MARKER ROUNDS

Force on Force™ Marker Rounds

Force on Force™ lead-free marker rounds boast reliable ballistics. Unlike other products on the market, these loads are primer-driven and do not use powder. Eliminating the use of powder as a propellant reduces the variability of these rounds. Barrel fouling is also significantly less. The marking agent has an extensive shelf life and leaves a distinct mark on target. Force on Force 9mm training ammunition also requires no special packaging to preserve the product. Marking agent on clothes never dries out, making quick wipe downs a breeze and machine washes even easier. These rounds were designed to be shot at soft tissue. For the ultimate realism, they are made to hurt.

Features & Benefits

- Lead-free
- No propellant means rounds are smokeless, odorless
- Extra-long shelf life
- Far less fouling than other rounds on the market
- Felt recoil similar to duty rounds
- Marking agent won't dry out
- Primer-driven
- Marking agent wipes off easily
- Accurate
- Made in the USA
- Aluminum case can be recycled

Part No.

FF9B1
FF9G1
FF9R1
FF9W1
FF9Y1

Description

9mm Blue
9mm Green
9mm Red
9mm White
9mm Yellow
